

## Spectrol Premium Way Lube 68

### Description:

Spectrol Way Lube 68 is a premium-quality lubricant specifically formulated to satisfy the requirements of medium size machine tools and flood application in large machines. They are formulated from high-quality base stocks combined with additives that provide good stick- slip friction characteristics, adhesiveness, foam resistance, metal wetting and lubricity. It has good adhesion to metal surfaces in the presence of moisture, and provides protection against rust and corrosion. It also has good oxidation resistance and thermal stability at high temperatures for long service life.

### Typical Applications:

Spectrol Way Lube 68 is suitable for use in the following specification.  
Cincinnati Milacron, Burhard and Weber, Dekel Maho, Bijur Oil filtration, Okuma etc.

### Typical Physical Properties:

| ISO Grades                   | 68    |
|------------------------------|-------|
| Density, lb/gal @ 60 °F      | 7.28  |
| API Gravity @ 60 °F (15.6°C) | 30.73 |
| Viscosity, @ 40 °C, cSt      | 67.86 |
| Viscosity, @ 100 °C, cSt     | 9.81  |
| Viscosity Index              | >100  |
| Flash Point °F               | 392   |
