

TAKE CONTROL OF YOUR COOLANT

FULLY AUTOMATED LEVEL & CONCENTRATION CONTROL

Increase Tool Life

Eliminate Overflows

Less Maintenance

Fewer Frustrations

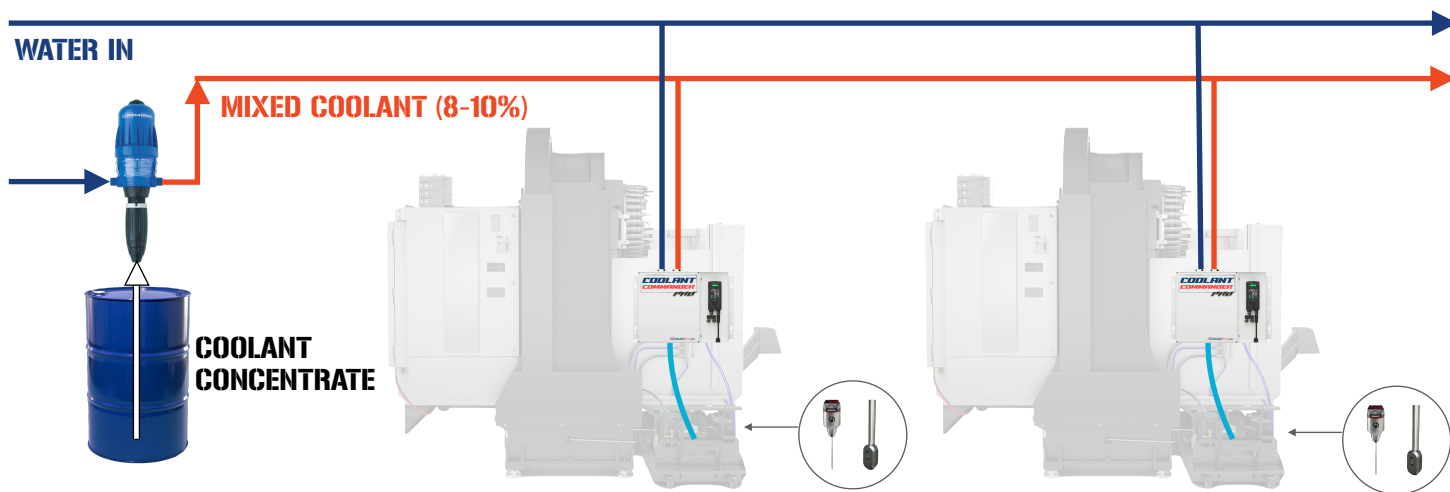

Golden Rules of Coolant Maintenance

1. Keep Coolant Tanks Full
2. Maintain Proper Concentration

It's That Easy, Especially with Some Help!

Coolant Commander PRO is a revolutionary coolant automation device that takes the guesswork out of fluid management. By automating filling and concentration control you can safeguard against operator error such as low coolant levels or tank overflows. Optimize your tool life by ensuring proper lubricity levels and free your high-value employees from completing mundane tasks - freeing them up for added productivity.

UNIQUE COOLANT & WATER ADDITION BASED ON REAL-TIME MACHINE DATA

Technical Information

Dimensions	16"W x 11"H X 5.5"D	Power Requirements	110V AC within 10 ft. / 24V DC Optional
Weight	11 Lbs.	Mixer Requirements	Water Powered Coolant Mixer
Mounting Options	Screw/ Magnet Option	Recommended Plumbing	PVC/ PEX + Ball Valves at Each Machine
