TAKE CONTROL OF YOUR COOLANT

FULLY AUTOMATED LEVEL & CONCENTRATION CONTROL

NO PLUMBING REQUIRED!

**Remotely Mounted
Screen**

**Level Sensor +
Refractometer**

WATER AND COOLANT AT EVERY MACHINE

Increase Tool Life

Eliminate Overflows

Less Maintenance

Fewer Frustrations

Golden Rules of Coolant Maintenance

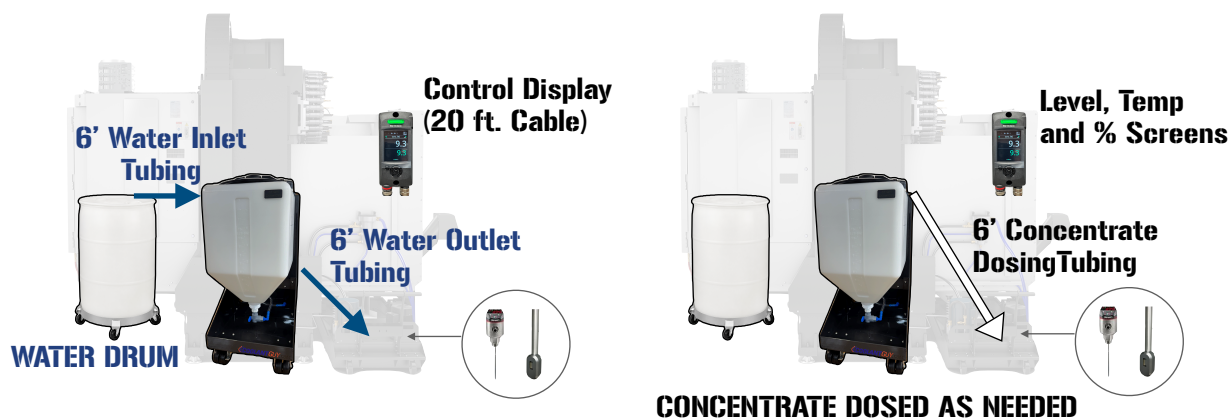

1. Keep Coolant Tanks Full
2. Maintain Proper Concentration

It's That Easy, Especially with Some Help!

Coolant Commander SOLO 2 is an innovative coolant automation device that takes the guesswork out of fluid management. Unlike the PRO and SOLO models, the SOLO 2 doesn't require plumbing throughout your shop. A nearby 55 gallon drum of water offers water and an on-board concentrate tank supplies coolant when necessary. When either metric drops, SOLO 2 automatically corrects. All tubing and fittings included, all you need is an empty drum (sold separately).

COOLANT COMMANDER SOLO 2 DOSES CONCENTRATE FROM ITS OWN TANK

NO WATER OR MIXED COOLANT LINES REQUIRED FOR INSTALL

Technical Information

Dimensions	16"W x 11"H X 5.5"D	Power Requirements	110V AC within 20 ft. / 24V DC Optional
Weight	40 Lbs.	Mixer Requirements	None
Mounting Options	Floor Mounted	Recommended Plumbing	None Required - Tubing Included

ELIMINATE OVERFLOWS LESS MAINTENANCE FEWER REJECTED PARTS INCREASE SURFACE FINISH
INCREASE TOOL LIFE
 LONGER COOLANT LIFE LESS BACTERIA GROWTH INCREASE PRODUCTIVITY
